

Open the PDF in the free Adobe Acrobat Reader. You can click on the middle columns of the below table to upload and image you have saved. Images will be best if they are 2 inch wide by 2.5 inches tall. The images will auto rotate but will not be mirrored. Once you have all images uploaded print out in B & W or Color. Cut out each row. You can then bend the two smaller “base” tabs and tape them together to make a tall triangle. You can tape a penny to this for weight.
